

ElectraTherm's Green Machine Generates Power from Waste Heat at Biogas Facility in the Czech Republic

Photos from the Commissioning Ceremony on May 16.

ElectraTherm and its Eastern European Distributor, GB Consulting, conducted a commissioning ceremony on May 16, 2012 in Moravska Trebova Brno, Czech Republic to celebrate the first ElectraTherm Green Machine on a biogas site in the country. The event participants included dignitaries from the US Embassy, ElectraTherm's Chief Executive Officer and high-level representatives from the Czech government and Brno community.
